Evaluations of Animals less than 12 months of age can be performed for private use of the owner. However, certification will not be provided at this age.
OFA recommends that the test be repeated when the animal reaches 12 months of age.

TEST: BASIC CARDIAC

RESULTS: Normal cardiovascular examination via auscultation. No evidence of congenital or acquired heart disease was noted. Since age and heart disease may overlap, these evaluations should remain valid for one year, and annual examinations are recommended to continue to monitor cardiac health.
